# Rural Cellular Corporation E911 Implementation Report May 3, 2004

# **Summary**

Rural Cellular Corporation ("Rural Cellular") operates wireless networks in rural communities in 14 states covering approximately 5.9 million people. Our service area encompasses 34 rural service areas (RSAs), 3 metropolitan statistical areas (MSAs) and a few partitioned basic trading areas (BTAs). The Rural Cellular networks utilize predominately TDMA/analog technology. Rural Cellular has started to deploy some GSM and CDMA overlays in several markets. These overlays are not yet available to Rural Customers.

#### Phase I

Rural Cellular continues to make progress in its efforts to deploy Phase I location capability services. For details on these deployments, please refer to the spreadsheet set forth in the Appendix to this report.

## Phase II

Rural Cellular also continues to make progress on its Phase II requests. As expressed in earlier reports to the FCC, Rural Cellular continues to have serious concerns about our ability to achieve FCC compliant accuracy with a network-based Phase II solution in our rural markets. Having completed numerous Phase II deployments with a network-based solution, we now have real data from these deployments which shows that call accuracy is falling short of the FCC mandated requirements.

# **Network Based Solutions in Rural Areas:**

In addition to the network-based solution provided by Grayson Wireless, Rural Cellular recently announced a commitment to deploy an alternative network-based solution provided by Polaris Wireless. Rural Cellular will deploy the Polaris Wireless solutions in certain TDMA and GSM networks. Rural Cellular will elect a handset-based solution for all of its CDMA markets.
